

HINT!

Top 25 50-Plugs for Gallons

Thrivers 50-Plugs Make Great Gallons!

If 50 is too many plugs for you, we recommend putting 2 plugs per gallon pot, they finish faster and 2-50's are often cost equivalent to 1-32 or 25, and are cheaper to ship!

Just plant 1 plug / gallon pot unless noted.

Aquilegia Songbird Cardinal	Leucanthemum Superbum White Knight

Grass, Strawberries & Cream (Feesey)	Scabiosa Columbaria Butterfly Blue
Herb, Lavender Munstead	Sedum Autumn Joy
Heuchera Palace Purple	

WANT TO SAVE \$3,700 PER GREENHOUSE???

Use “Thrivers” 50’s for gallon production instead of more costly 32”s!

A 30' x 100' greenhouse holds approximately 10,000 gallon pots

You save approximately \$5,000 by using 50 plugs instead of more costly “32”s.

50's will finish at about the same time as a “32,” * especially when given 7 – 10 more warm growing days.

**Maximum fuel usage to run 68° nights/70° days for the first 7 – 10 days is
approximately \$1,300.**

= Your net savings of \$3,700!

* In many cases 50's will finish at about the same time as a 32 without extra heat giving you even more savings!
